

Additional Creativity Resources

Xtra Normal

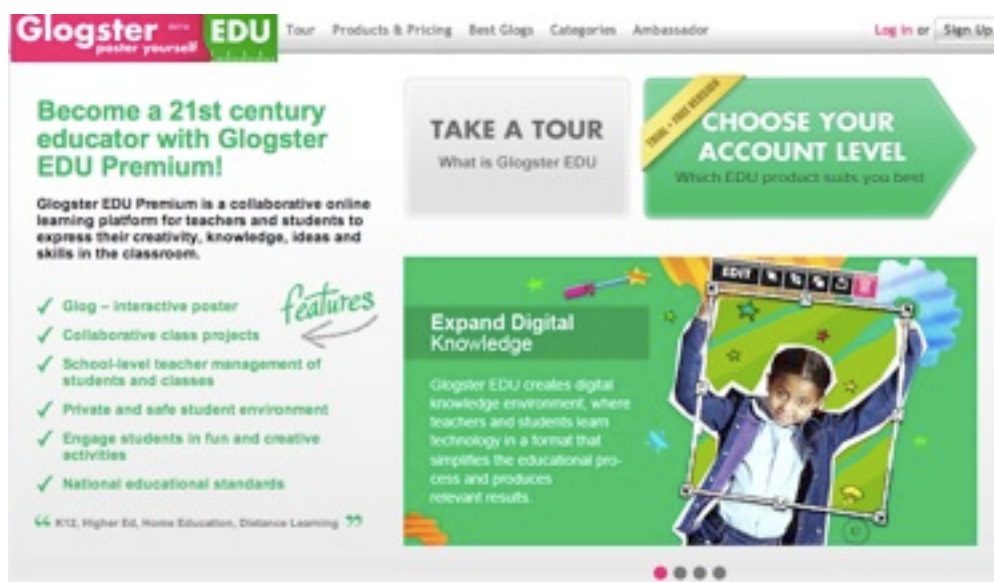

<http://edu.xtranormal.com/>

Xtra Normal is a text-to-movie website which allows you and your students to create short films with your own scripts using very clever text-to speech technology. This means your students write a script and then feed it into Xtranormal to produce films with characters enacting it. The free version of Xtranormal allows for a maximum of two characters so creating dialogues amongst characters is a breeze!

Storybird

<http://storybird.com/>

Storybird is a collaborative story telling website that allows children, students, teachers and families to create, view and share short stories and infuse them with creative artwork. Two or more users create a story by sharing their ideas (words and pictures) and working collaboratively either in a typical classroom or home setting or by working with others in alternate locations over the internet.

Glogster

<http://edu.glogster.com/>

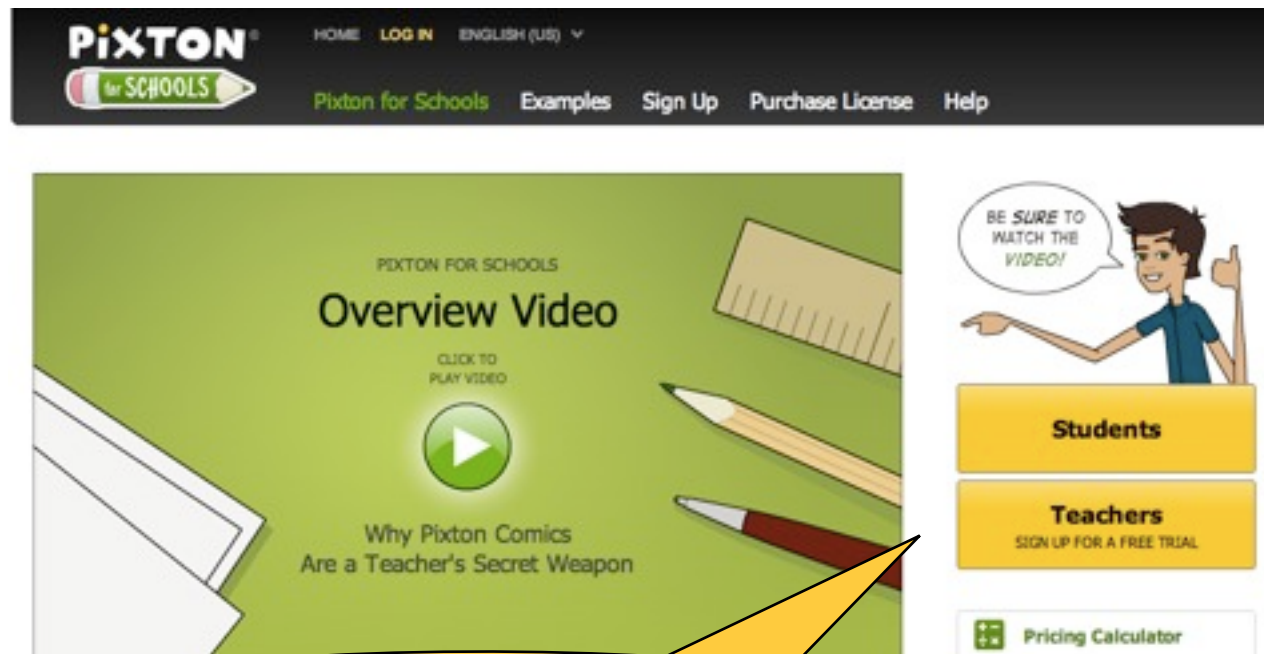

Glogster is an online tool for the creative, visual learner to make a multimedia poster. A Glogster is a poster with video, text, pictures, and sound. While many use it to make posters about themselves, Glogster has also been used collaboratively in the classroom.

Animoto

<http://animoto.com/>

Animoto is presentation software with a twist – the presentations you create are paced to your music selection, and the images you select are randomly ordered, turning a simple presentation into a unique "trailer". It is a unique and powerful creation tool and it allows users to easily export their videos to other online accounts.

Pixton for Schools

<http://www.pixton.com/schools/overview>

Pixton for Schools is a private, virtual classroom that integrates award-winning comic creation software in a fun, interactive learning environment. Apply this easy-to-use web-based tool to a wide range of subject areas, skill levels and learning styles.
